Cpts 317. 9/2

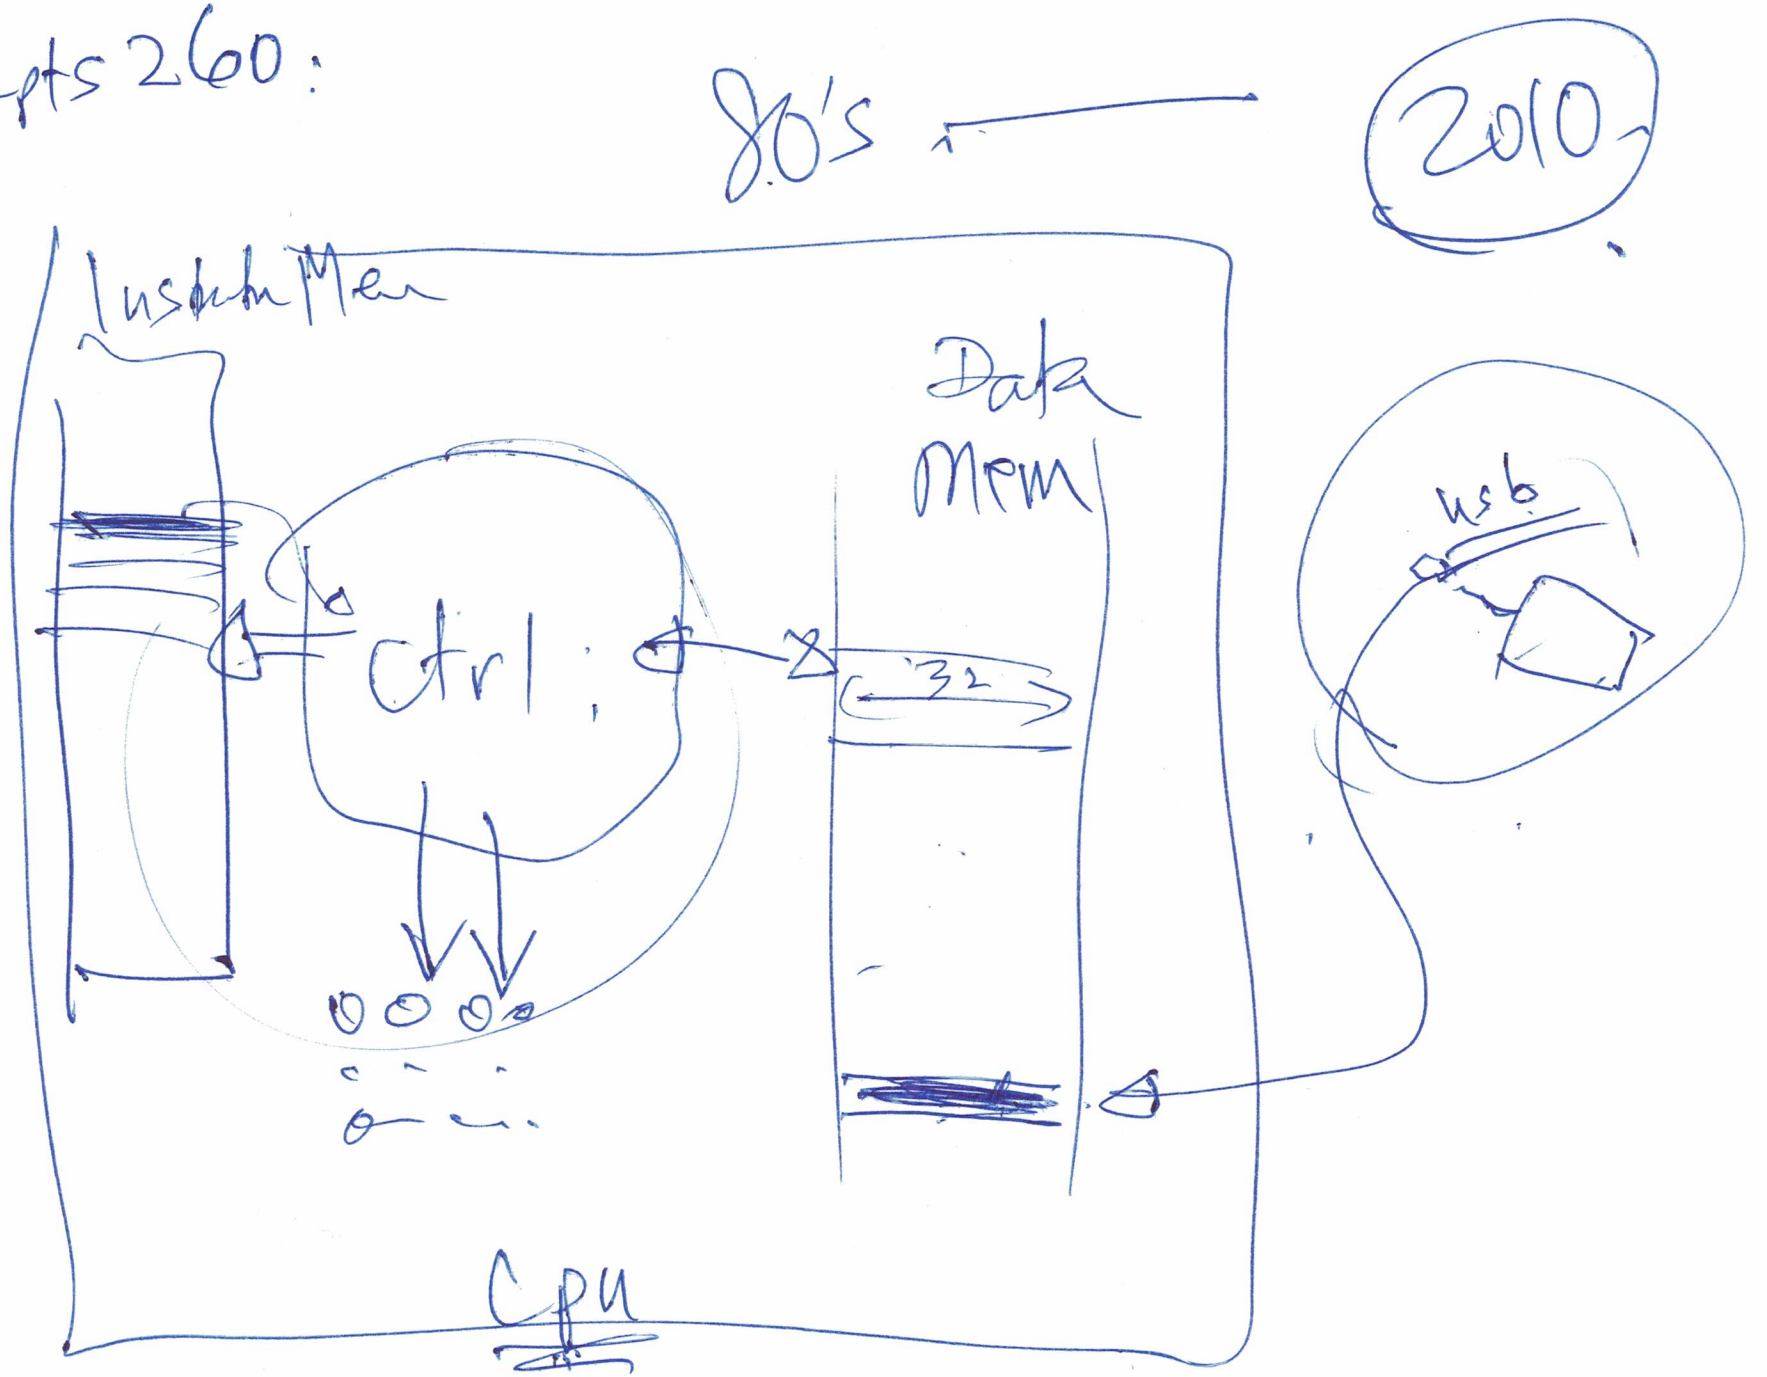
Writing RegExp.

HW0.

1 & 2: look at lecture notes (first lecture).
the example using interrupt.

prob 1. I want my program to output each of all possible strings set: "containing at least three a's". when the program exit nicely.

Cpts 260:



abbaabbaabab

Each second, robot show a

or show b

earthquake

int k = 0;

stop inc when k ≥ 3.

while at each second,

{ if earthquake happens, { show a; k++; }

else show b;

if ~~humico~~ dog barks, break;

}

if k == 3, exit nicely

else crash;

Prob 4.

abaasabbabbaaa

~~aaaaaabbbbb~~

ababababababababab

① Best. Kolmogorov Chatin Complexity.
(not computable)

② Very Good. gzip. 7z.

LZMA.

LZ —— Lempel-Ziv.

Compression ratio.
